

# CITY OF D'IBERVILLE

**21** years is not a long time in the life of a city. For the City of D'Iberville, those formative years have seen remarkable change. The year 2009 finds D'Iberville a very different city from its incorporation of 1988. Today, we see a city breaking out of its shell, growing every day with new developments and a progressive plan for the future.

Our financial condition is healthy and we benefit from an effective administration, a professional staff and a highly dedicated Mayor and City Council. In everything we do we remember our history while always looking to the future and to the potential of what we can become.

At twenty-one we are a great progression from our beginning. Yet, we are still young. Our potential is great and we have only begun to fulfill the promise of what we can be. It's that vision of the future that drives our government, our staff and our citizens every day.

In this, our 2009 Progress Report, we present our current status and part of the vision of what the future of D'Iberville can and will be.
