From: Daniel R. Boudreaux, Jr. *DRB*

Re: Flood Zone Base Elevation Determination @ Longwood Subdivision

In reviewing the flooding situation in Bridgewood Subdivision, a flooding problem was recognized in Longwood Subdivision. The maximum flood elevation as determined by the County Surveyor, Mr. Owen Hines, was 24.00'. The FEMA 100-year base flood elevation depicted on FIRM Community-Panel Number 285255 0140 E, dated August 4, 1988 is 14'. Elevations of home that had flood water above the finished floor elevation were 23.00', 22.88', and 22.70'. With this information, I recommend the minimum finished floor building elevation be a minimum of 25.00'.

If the contractor is able to provide information that this elevation is excessive based upon the actual field data, I will be happy to re-evaluate my recommendations.

Should you have any additional questions, please do not hesitate to call.

Daniel R. Boudreaux, P.E.
County Engineer
